Aditya Shrivastava

+7899463519 | srw.aditya@gmail.com | Hyderabad, India

Summary

Experienced Software Test Engineer with over 8 years of expertise in automating complex workflows and testing environments. Proficient in Python, Selenium, API Testing, JavaScript, and TypeScript, with hands-on experience in Playwright, GraphQL API automation, and the Robot Framework. Strong background in functional, regression, smoke, and sanity testing, coupled with experience in cloud platforms and DevOps tools like Jenkins, Azure, AWS and Jira.

Skills

Python, JavaScript, TypeScript, MySQL, GraphQL, API Testing, Postman, Jenkins, Git, Jira, Azure, AWS, Jmeter, Playwright, Selenium, RobotFramework, Cucumber, Pytest, Exploratory testing, Smoke Testing, Regression Testing, Sanity Testing, Agile Methodology

Experience

ADP | Hyderabad, India
Senior QA Test Engineer | 08/2024 - Present

- Leading test automation efforts for critical projects using **Typescript** or **Javascript** and **Playwright** with **GraphQL**.
- Collaborating with development and product teams to ensure seamless testing workflows.
- Integrating automation scripts with Jenkins and **AWS** DevOps for CI/CD.

Eurofins IT Solutions | Bangalore, India
Senior QA Test Engineer | 08/2022 - 04/2024

- Automated API testing using **Python** and **Pyetst** for APIs, improving the efficiency of the testing process by 30%.
- Utilized **Javascript** with **Playwright** and **Selenium** and **Robotframwork** to design robust UI automation frameworks.
- Implemented test reporting and logging using Jenkins and **Azure** Dveops, maintaining consistent code quality.

CGI | Bangalore, India
Senior Software Engineer | 08/2021 - 07/2022

- Designed and executed test automation strategies using **Selenium**, **Python** and **Robot Framework**.
- Conducted functional, regression, and sanity testing for complex systems.
- Integrated automated test suites with **Jenkins** for continuous integration and testing.
- Performed manual testing to deliver quality assurance and ensure the integrity of solutions in the hands of customers

infinite Computer Solutions | Bangalore, India
Software Engineer | 08/2018 - 07/2021

- Developed end-to-end test automation scripts using **Selenium** for web applications.
- Collaborated with cross-functional teams to troubleshoot and resolve issues.
- Developed comprehensive test plans strategies to evaluate system performance based on system requirements.
- Created, optimized, and maintained performance test scripts using **JMeter** for various applications, including web and API-based systems

DynaKode Innovation | Bangalore, India
Systems Engineer | 10/2017 - 07/2018

- Created automated scripts using **Python, Selenium** to validate API functionality.
- Writing clear and concise feature files using **Gherkin syntax** to create behavior-driven development (BDD) scenarios that align with client or stakeholder requirements. These scenarios ensure the application behaves as expected from an end-user perspective.

Education

IIIT, Bangalore , PGDM/3.4+ CGPA Passed Year:-11/2017

SUS College of Engineering & Technology
B.Tech - 72.04 % Graduation Date:-06/2015
